# BRAINBASED LEARNING

Advanced Treatment. Accelerated Results.

As a Chiropractic Neurologist, Dr. Slone has developed a **BrainBased Learning Program** and has been trained to evaluate and treat many neurologic conditions such as *Dyslexia, Autism, ADD/ADHD and Obsessive Compulsive Disorder (OCD)*. Treatment is designed to treat an area of the patient that is often overlooked... **THE BRAIN.** Often times, a patient who is experiencing difficulty with learning or with behavior,

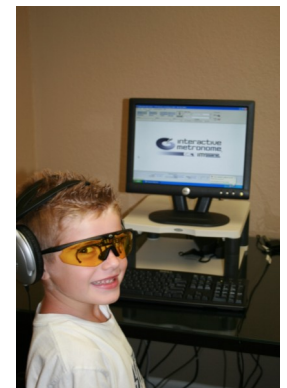

has a nervous system that has not fully matured causing an imbalance between one side of the brain with the other. By treating the area of the brain that is underdeveloped, the patient's brain functions at a higher level. By understanding functional neurology, and utilizing the latest technology, Dr. Slone is able to identify and treat the nervous system appropriately, enhancing overall function of the patient.

## CONDITIONS TREATED

- ADD
- ADHD
- Dyslexia
- Autism
- Obsessive Compulsive Disorder
- Social Behavioral Conditions
- Learning Difficulties
- Auditory Processing Disorders
- Visual Processing Disorders
- Sensory Motor Conditions
- Developmental Milestones
- Memory and Concentration
- Balance and Coordination
- Athletic Enhancement
- Car/Motion Sickness
- Sleep Apnea

## ADVANCED TECHNOLOGY

- *Videonystagmography (VNG)* is used to evaluate eye movement and visual tracking as it relates to brain function.
- *Computerized Assessment Posturography System (CAPS)* is used to address nervous system dysfunction as it relates to balance, fatigability, adaptation and muscle imbalances.
- The *Interactive Metronome* is used to address sensorimotor integration.
